

# Task Group Chair & Technical Contact Responsibilities

# Objectives

---

At the end of this module, you will be able to serve effectively as a Task Group Chair and Technical Contact by:

- ✓ Handling administrative responsibilities
- ✓ Conducting an effective and inclusive task group meeting
- ✓ Preparing items for Sub and Main Committee ballots
- ✓ Resolving negative votes on the website
- ✓ Utilizing available resources at ASTM Headquarters

---

# Being an Effective Task Group Chair / Technical Contact

# What is a Task Group?

## Task Groups are formed for:

- Technical Discussions
  - ❖ Creating new standards
  - ❖ Reviewing and revising existing standards
  
- Administrative Work
  - ❖ Promote membership/publicize activities
  - ❖ Plan a symposium

# Responsibilities of Task Group Chair

---

- ✓ Establish missions and goals of task group
- ✓ Assign a small working group with experience and expertise
  - Ensure key players of industry are involved
- ✓ Assign tasks with deadlines
- ✓ Organize meetings
  - Use face to face or virtual meetings
- ✓ Coordinate task group reports at subcommittee meetings

# Inclusive Task Group Leadership

An inclusive leader ensures that team members:

- Feel like they belong
- Are valued and respected
- Are given an opportunity to participate in the team's efforts
- Can bring their authentic self to the task at hand

Interlaboratory Study (ILS)

Plan Online Mtg/Conf

# Effectively Running a Meeting

## Before the Meeting:

- ✓ Prepare agenda/presentation/TG report
  - Include ballot results, if any
- ✓ Review ballot results, correspondence with negative voters, any action items from previous meeting
- ✓ For subcommittee meetings, contact subcommittee chair with meeting requirements

# Effectively Running a Meeting

---

## During the Meeting:

- ✓ Start on time
- ✓ Review the agenda and revise as necessary
- ✓ If using virtual meeting tools, ensure all attendees know how to log in and use meeting tools
- ✓ Recognize attendees who wish to speak
- ✓ Maintain Order

# Examples of *HOW* to be in Inclusive

## Effort

- **Make a conscious and genuine effort to get to know each team member**
  - Explore what each team member can contribute to the team, task, and organization.
  - Be committed to being inclusive and the effort required
  - Enhance your cultural competency and be aware of your own biases
  - Be brave and have humility in the face of mistakes.

## Awareness

- **Consider team members contributions and attributes:**
  - Be curious about Life and Career Experiences
  - Reflect on how these experiences bring different types of value to the table.
  - Apply what you learn and encourage members to consider and apply their own value attributes.
  - Remember that marginalized individuals may be risk averse or more conservative in their contributions.

## Empathy

- **Demonstrate empathy and compassion for others and self.**
- Strive to create a sense of safety and openness within the team:
  - Enable voices
  - Open the discussions and encourage team member contributions
  - Support team members through connecting and empowering their work
  - Consider innovative ways to create an inclusive environment, like using closed captioning or other technology available.

# Ways to help Group Meetings be Inclusive

- Welcome people by name – connect with each person
- Seek out new members or guests joining
- Seek broad input; consider asking reserved members for their perspective
- Provide ways for perspectives to be gathered beyond standing up in the discussion.
- Set the tone/expectations – Come ready to share, listen and learn
- Consider strategies when strong personalities do most of the talking
- Ask open ended questions
- Value each person independently
- Empower the whole team in being part of the process

# Task Group Reports

## Written report to be included in subcommittee meeting minutes

- Report(s) should include:
  - ✓ The status of the project, including projected timeline for milestones
  - ✓ A recommendation on items for ballot
  - ✓ A recommendation for disposition of negative votes
  - ✓ Requests for data, review or assistance from ILS

# Responsibilities of the Technical Contact

---

- Main author of new draft standard or revision
- Should be very familiar with standard
- Practice good communication skills
- May be asked to address technical questions about the standard, but cannot provide official interpretations
- Consider revisions needed based on customer inquiries

# Responding to Inquiries on Standards

---

- ASTM membership and staff are prohibited from offering official interpretation of standards
- Official responses must follow Section 16 of the ASTM Regulations
- Inquiries may be handled informally by Subchairs and technical contacts
- Be clear that the response is a personal opinion
- Do not use ASTM stationery for the response

# Leading the Balloting Process

- ✓ Gain approval of subcommittee chair for work item registration
- ✓ Register work item via MyASTM
- ✓ ASTM requires the following items for registration:
  - Rationale for the activity
  - Scope, keywords, target ballot date
- ✓ Write the draft standard or revision
- ✓ Submit draft to ballot online with rationale/cover letter

### Work Item Registration

Note that the following choices refer to new additional material in your proposed revision and the choices do not apply to currently published ASTM standards.

Please select one of the following choices regarding this Work Item.

- I am submitting original material (i.e. it is not copyrighted, patented, pending patent, or published elsewhere)
- I am not submitting original material (i.e. it is copyrighted, patented, pending patent, or published elsewhere), but I am authorized to and agree to release copyright.
- The material I am submitting is not original and I am not authorized to release copyright.

I have read and will comply with [ASTM International's Intellectual Property Policy](#). I hereby grant and assign to ASTM International all and full intellectual property rights, including copyright, in the proposed draft standard/text and any contributions I make to ASTM International in connection with this proposal. I understand that I will have no rights in any publication of ASTM International in which the proposed draft standard in this or similar form is used. To the best of my knowledge the proposed draft standard/text is not subject to copyright of any other person or entity. I agree not to reproduce or circulate or quote, in whole or in part, this document outside of ASTM Committee/Society activities or submit it to any other organization or standards bodies (whether national, international, or other) except with the approval of the Chair of the Committee having jurisdiction and the written authorization of the President of the Society.

## Work Item Registration - Revision - C12.03

The contents of these fields will serve as the posted Work Item on the web. The Technical Contact for this Work Item will receive a Word version of the existing standard from ASTM International for preparation of the ballot.

Note: Fields marked with an asterisk are required.

\* Which C12.03 Standard are you revising?

\* Rationale for Revision

Note: All revisions for this standard being considered by this Task Group should be included under this Work Item. Use good judgement when registering separate Work Items for revisions to different sections of the standard. If appropriate you can split this Work Item into separate ballot items when you Submit Item to Ballot.

List other ASTM Committees or key outside organizations that you feel should be informed of this activity:

Work Item Registration - Revision - C12.03

Work Item Type:  
Revision

Copyright:  
Yes, authorized to submit original material

Revised Standard:

Sponsoring Subcommittee:  
C12.03

Technical Contact:  
Krista Robbins - krobbins@astm.org

Target Ballot Date:  
03/2022

Authorization Date:  
11/2021

Emergency Response:  
No

Target Completion Date:  
02/2022 to 05/2022

Rationale:  
Updating the scope of the standard and section 4

Overview Members History Edit Collaboration Area Schedule Online Meeting

## WK62872 - Revision of F1959/F1959M-14e1 Standard Test Method for Determining the Arc Rating of Materials for Clothing

Group Creation Date: 03/28/2018  
WorkItem Creation Date: 03/27/2018  
Ballot Target Date: 06/2019  
Work Item Status: Proposed  
Status: Draft Withdrawn

### Work Item Description

Here are the major points of this proposed revision: Section 1 scope, minor editorial changes Section 3 Terminology, small editorial, units and added AR(limit) as new term in Arc Rating to be used when limited to 100 cal at top end. -Section 6 Apparatus. - This section was all mixed going back and forth between construction, placement and specification and method. I tried to untangle this and separate into clear text for each. - Much more detail for panel and monitor construction - added Table with specific distance and angles for calorimeters - specification for the structural cage added - specification for electrical supply expanded - specification for data acquisition system improved - All drawings need updating, old drawings remain for now Section 7 - precaution -More straightforward listing of the hazards rather than state what safety barriers of process should be done. Each laboratory and country will have its own requirements for dealing with hazards. Section 8 - sampling -Minor changes, clarified test preconditioning requirements, previous were too restrictive and intended to be for accurate AAD determination. Section 9 calibration -Calorimeter check procedure cleaned up and made easier to follow. -Apparatus verification procedure cleaned up and made easier to follow. Prior reference of base shots was based on calculated level and % high/low of laboratory. New requirements are based on actual incident energy level obtained from years of testing and based on result from 3 laboratories. Section 10 apparatus case and maintenance -Mostly editorial to have more detailed instruction and process for maintenance and care. Section 11 Procedure -Previously this was difficult to follow having test procedure and calculations intermixed. Attempted to separate procedure from process from calculations into a logic order to follow. - 11.1 general procedure -11.3 Sequence for ATPV -11.4 Sequence for Ebt -11.5 Arc rating limit Section 12 Interpretation of results -Completely re-organized to contain all calculation and process for determining arc rating -12.1 determining time zero -12.2 heat energy calculation for all calorimeters -12.3 incident energy (EI) -12.4 Panel sensor energy -12.5 Stoll curve comparison -12.6 determination of ATPV -12.7 determination of Ebt -12.8 Establishing Arc Rating Section 13 reporting -Cleaned up the report requirements -Straightforward what is required as minimum, based on what has been requested for past years of testing and useful to end-user.

## Submission of Ballot Item - Revision - Concurrent Subcommittee/Main Committee/Society Review

Use the features below to post a file attachment for this Ballot item.

The contents of your ballot item must include:

- Rationale for Ballot Item
- Contents of ballot item (using MS WordTrack Changes feature when possible to identify changes from published version)
- Any Related Figures

The formatting requirements for ballot item submission are:

- MS Word Documents (.DOC)
- Only a single file can be uploaded
- If you have multiple files for this item .ZIP file with all materials included OR append all information into a single MS Word (.DOC) file and attach or email documents directly to staff.

### Upload Attachment:

Click browse to select an attachment from your computer for **WK13973** (full path and file name required e.g. C:\Data\test.doc)

Choose file...

Please do not click the Upload Attachment button more than once. Uploading may take some time depending on the size of the file and connection speed. When the upload is complete, a page will appear where you can review and approve the submission to be sent to ASTM HQ.

# While the Item is on Ballot

---

- Email notification will be sent when a negative vote or comment has been received
- Ability to monitor ballot input when received
- Can view, print and download negatives and comments
- Communicate with negative voters

# After the Ballot Closes

---

- Review ballot results, comments and negatives
- Contact negative voter(s) prior to subcommittee meeting
- Communicate with subcommittee chair to determine if a virtual meeting, time during the subcommittee meeting, or both are needed to address ballot results
- Inform negative voters of the outcome of vote consideration

# Reviewing Ballot Results and Resolving Negative Votes

Statement:  
**Section Statement**

By stating 8" in any direction, it could cause an undue burden for a manufacturer. This is a ridiculous example, but it is to make my point: a slot of 1" x 8 1/8" would require a secondary safety apparatus as defined in 7.6.9.

## Technical Committees

Technical Committees develop and maintain ASTM standards. They are grouped by designation according to related activities within a particular scope of work (ex: A01 on Steel, Stainless Steel and Related Alloys). ASTM Committees are made up of over 32,000 volunteers from industry and include manufacturers and consumers, as well as other interest groups such as government or academia. Any interested individual can participate on a Technical Committee through ASTM membership.

# Remember: Practice Inclusivity!

---

- **Being Inclusive and creating a sense of belonging within teams requires personal effort:**
  - Grow your own social and cultural awareness
  - Practice self awareness and explore your own personal biases
  - Identify barriers to inclusion and work to remove them
  - Set the tone and model behaviors you expect from others
  - Support people in getting to know one another
  - Encourage knowledge sharing and being open to change
  - Explore different leadership styles to assist different situations or personalities
  - Practice, practice, practice!

---
